

FOTECHEM 2002

SPT SALES +
MARKETING GMBH

FOTECO REMCO SAATI

Hazard-free, flow-support coupled up with degreaser for direct emulsion coating.

1. PROPERTIES

FOTECHEM 2002 is a ready to use gel and can be applied with a brush or a coating through.

This mesh pre-treating product can be used on all mesh types. It combines a perfect degreasing with a mesh pre-treatment which improves the following coating very much.

The result is a coating with nearly no needle holes or fisheyes. Both products are lightly sour and odourless.

2. APPLICATION

Apply from both sides until light foam appears and let absorb 1-2 minutes. Then rinse well with water.

3. HEALTH AND SAFETY

These products are for industrial use only and should be kept away from children. To protect eyes protective goggles should be worn and the safety data sheets have to be considered.

4. PACKAGING - STORAGE

Available in 1 Liter and 5 Liter containers. Storage life time up to 1 year.
